AVIK CHAKRABORTY

Mobile: +91-8143434301 ✖ +91-3512-267102
Email: avik@bhel.in ✖ avik_cseiitkgp@yahoo.co.in ✖ avik.chakraborty@gmail.com

I have a Bachelor of Technology Degree in Computer Science & Engineering from Indian Institute of Technology, Kharagpur (CGPA 8.49) with more than 14 years of work experience presently working as a Manager (Information Technology) in Bharat Heavy Electrical Ltd (BHEL), Kolkata. I have comprehensive problem solving abilities, good verbal and written communication skills, ability to deal with people diplomatically and willingness to learn and be a team facilitator. I would like to contribute to the field of AI by doing extensive research at your esteemed organization. Please find my resume furnished below for your kind perusal and consideration of my candidature.

EXECUTIVE SUMMARY

- **B. Tech. (Computer Science & Engineering)** from **IIT, Kharagpur** with **over 13 years** of experience in Project Management, Software Development and Testing.
- Proficient in handling activities pertaining to requirement analysis, project design, coding and project management activities and coordination.
- Deft at end-to-end implementation of the SDLC, including finalization of specifications, design, development, implementation and quality assurance.
- Expertise in working across diverse technology platforms and Software Development including Analysis & Study of Business Requirements, Technical & Functional Specifications, Testing, Integration & Implementation and Service Support.
- Excellent communicator with honed analytical and problem solving skills. Expertise at understanding the business and technical requirements of implementing and managing online trading systems for cash and commodity market.

Core Competencies:
Project Management •Software Development • Software Testing • Innovation and Collaboration • Multitasking in Fast-paced Environments • Articulate Oral and Written Communication • Quick Problem Resolution and Decision Making • Building Relationships • Exceptional Presentation Skills

CAREER CONTOUR

Since Jun 2007 with BHEL

Jun 2019 – till date as Manager (Information Technology), Kolkata
Jun 2016 – Jun 2019 as Deputy Manager (Information Technology), Kolkata
Jun 2012 – Jun 2016 as Senior Engineer (Information Technology), Kolkata
Jun 2007 – Jun 2012 as Engineer (Information Technology), Hyderabad

Key Deliverables:

- Analyzing project requirement for further proceedings and delivering and implementing project as per scheduled milestones
- Developing and maintaining Application Software, Database, System and Network management
- Handling invoice generations during month end billing, timesheet approvals from the customer
- Proficient in Software Testing Cycle involving Analysis & Study of Requirement Specifications, Test Strategy, Test Planning, Test Scenario, Test Case/Script Development, Metrics Development & Recording, Test Data Recording & Analysis, Quality Documentation and Reporting
- Preparing test matrix, test plans and strategy documents for a project along with release to field documentation while adhering to release process for installation / upgrades and patches
- Contributing software engineering expertise in the development of products through the software lifecycle, from requirements definition through successful deployment
- Facilitating customization of systems by encouraging software engineering team to adopt emerging standards for software application development architecture and tools
- Managing the services delivered for the owned applications/ projects
- Administering the functions of the solution life cycle including scoping, design & development and testing
- Planning and monitoring successful roll out of new and changed software and associated hardware and documentation
- Carrying out communications between all supports teams while monitoring service delivery of the teams
- Performing routine team administration tasks such as tasking, monitoring and appraisals
- Excelling in rapid application development and management of technological issues for assigned projects, earning the highest customer satisfaction rating for all software solutions delivered
- Introducing methodologies and best practices that enhanced product definition, release processes and customization of applications to user needs

PREVIOUS ASSIGNMENTS

Taray Technologies, Hyderabad	EDA Software Engineer	Jun 2005 - Nov 2005
IBM Global Services, Kolkata	Software Engineer	Jun 2004 - Nov 2004

US PATENT

- US7398500: “Netlist synthesis and automatic generation of PC board schematics”

COPYRIGHTS

- "System for purchase related activities, data access through network (PRADAN) on SAP-ERP platform" Reg No. SW-6173/2013
- "Web-based portal for subcontract vendors on SAP-ERP Platform" Reg No. SW-6430/2013
- "System for manufacturing quality plan (MQP) on SAP-ERP Platform" Reg No. SW-6765/2013
- "Portal for Chinese Vendors on SAP-ERP Platform" Reg No. SW-6849/2013
- "Web-enabled SAP-DMS based quality document portal for third party inspection agencies” Reg No. SW-7006/2013
- “System for material discrepancy reporting on SAP-ERP Platform” Reg No. SW-7158/2013
- “System for site action request & commissioning action request on SAP-ERP platform” Reg No. SW-7175/2013
- “System for direct-despatch & site discrepancy reporting on SAP-ERP platform” Reg No. SW-7476/2013

CONFERENCES/ WORKSHOP PROCEEDINGS

- "Testing of Bridging Faults in AND-EXOR based Reversible Logic Circuits", Avik Chakraborty, CoRR abs/1009.5098: (2010)
- "Synthesis of Reversible Circuits for testing with Universal Test Set & C-Testability of Reversible Iterative Logic Arrays", Avik Chakraborty, International Conference on VLSI Design, 2005
- “Testability of AND-EXOR Based Iterative Logic Arrays”, Avik Chakraborty CoRR abs/0805.1293: (2008)
- “On The Optimality of Adaptive Excess Available Bandwidth Allocation by a Guaranteed Rate (GR) DiffServe Scheduler in an Ad-hoc Mobile Network” Avik Chakraborty, International Conference on High Performance Computing (HiPC 2004)
- "An Approach to prioritize Test Cases for Object Oriented Programs", Rajib Mall and Avik Chakraborty, Proc. of International Workshop on Software Design & Architecture (SODA’2002) Held in IIT Madras in December, 2002
- “An Indian Languages Speech Interface for Empowering the Visually Handicapped ". Anupam Basu, Satya Jyoti Chattopadhyay, Avik Chakraborty, Debasish Sen, Shiraj Sen : IIT Kharagpur Development by design, (DyD02) Bangalore, Dec 1-2, 2002

ACADEMIC CREDENTIALS

B.Tech. (Computer Science & Engineering) from Indian Institute of Technology, Kharagpur with 8.49 CGPA; 2004

ACCOLADE

- Bagged Jagadish Bose National Science Talent Search (JBNSTS) Encouragement Award

TECHNICAL SKILLS

- Data Structure, Algorithms, Operating System, Compiler Design, Database, Networks
- Platforms: Unix, Linux, Window NT/XP/2000/ME/2003/2008/10, Sun Solaris
- Languages: C, C++, PL/SQL, Core Java, Advanced Java, HTML/DHTML/JavaScript, JSP, XML, ABAP, Ajax, R, Python, AI/ML, Data Science
- Web Services Architecture: J2EE, J2ME
- Databases: Oracle 11g, DB2
- Tools: WSAD v.5.0, JCreator Pro, Rational Rose, Eclipse, JDeveloper, Netbeans IDE
- Hardware: Assembly Language, Verilog, VHDL, Cadence ICFB, Silicon Ensemble, Design Compiler from Synopsys
- Web Server: Apache Tomcat, Weblogic
- Framework: Struts
- ERP: SAP ABAP, QM (Quality Management Module)

PERSONAL DOSSIER

Date of Birth:	16th December 1981
Current Address:	Flat No.3, 1st Floor, Shradhanjali Apt, 503, Dum Dum Park, Kolkata, PIN - 700055
Permanent Address:	C/o Nidhir Ch Chakraborty, 118, Sudha Bhavana, Banshbari, P.O & District Malda, PIN - 732101, West Bengal

Passport No.: K3623735 (Valid till: 2022)
Languages Known: English, Hindi and Bengali

PROJECTS UNDERTAKEN

Project Details

Handling Work Orders of Pulverizer Mills in SAR/ CAR Portal

As the Online SAR/CAR system calls for one SAR/CAR per work order and each Pulverizer Mill has its own. Work Order, this makes the numbers of SAR/CARs generated from same site for the same problem as many as the number of Mills. This leads to a multifold increase in the number of SAR/CARs received in a year for Mills. To address this requirement, facility has been provided so that the site engineer can raise single SAR by selecting any one Mill's work order in case the Reported problem is identical across all the mills of a Project. Benefits: The site user needs to raise only one SAR (or CAR) in case the reported problem is identical across all the mills of a Project, by selecting any one Mill's Workorder.

Project Details

AB Number System (Web Based) with SAP interface

Circumventing the constraints imposed by SAP in terms of Number of Licenses and users accessing SAP concurrently, this SAP based Web-enabled AB Number System facilitates users to process Vendor Bills / Invoices, without any restrictions i.e. access the System from Intranet (without having log into SAP). 2) The Project uses the 'Remote Function Calls (RFC)/ BAPIs' of SAP and open source JAVA Connection Objects (JCO) to enable an on-line/real time interface between SAP and Custome made Third Party Applications developed by BHEL using JSP. Benefits: 1) Cost of each SAP license is Rs. 1,00,000/-. AB No generation / processing is performed by almost all executives. Granting access to all executives, to enable them generate/process AB number, would have meant procuring that many licenses. 2) In terms of financial gains, this SAP based Web-enabled Intranet on-line AB number system has obviated the need to procure that many licenses and thus saved precious revenue. It is observed that as many as 750+ users have so far used the system to raise AB Nos by logging into this system with their Staff no. Majority of these users do not have SAP logins. This testifyes the savings gained /made possible by this system. 2) The technology and concept used by this project has opened up possibilities of developing. Custom made Applications allowing users from any disparate / remote locations to transact with SAP. This again will result in critical savings by minimizing the requirement of additional SAP licenses. 3) In terms of intangible gains, this system offers a very user friendly Interface and Screen, maximizing end-user's productivity and comfort (unlike SAP screens which are relatively more complex). Advantages: Bills / Invoices submitted by vendors are forwarded to Finance by the concerned Employee through On-line AB number System. This On-line AB number system, developed and deployed on Oracle Platform, was accessible to all employees and had no restrictions in terms of usage. However after migrating to SAP platform, this system was rendered defunct, as all financial transactions had to be performed only in SAP. But having procured only 600 licenses of SAP, the process of generation of AB Number is limited to only 600 concurrent users.

Project Details

HR Reward/ Incentive Enquiry

This project provides the information about Reward/Incentive earned by an employee. An employee can login to the system with his staffno and DOB which are maintained in HR module of SAP, and enquire about his performance rewards in terms of indices viz. "Efficiency", "Reward Amount", "Extra Hrs", "Extra Amount" and "break-up of extra hours (based on category)". Once logged-in, the system fetches all these data from multiple tables in SAP and renders them in a user-friendly format. Benefits: Earlier the HR/Finance department had to print and distribute the performance rewards. It was time consuming and impacted productivity of both employee and company. The new system provides all the information just on a click of mouse saving time and discomfort. The printing cost of nearly 4000 slips per month can be avoided now onwards. Advantages: All the recipients (workers) get informed about their incentives thru Hard copy print out (pre-printed stationary) along with Pay-slip. Further, for any details regarding the same, enquiries are made manually to IT dept.

Other Projects Undertaken:

- A Lightweight Implementation of Daily Progress Reporting System
- A Lightweight Implementation of File Tracking System in Weblogic
- A Lightweight Implementation of Secure Vendor Payment Status System
- A Lightweight Implementation of Freight and VAT Billing System in Oracle
- A Lightweight Implementation of Price Variation Clause (PVC) Billing System
- A Lightweight Implementation of Invoice Register & Collection Module in Oracle
- A Lightweight Implementation of PG/MA/DU based Billing & Invoicing System
- A Lightweight Implementation of Online Bank Guarantee System
- A Lightweight Implementation of Online Invoicing System in Inclusive Tax Scenario

- A Lightweight Implementation of Online Invoicing System in Exclusive Tax Scenario
- A Lightweight Implementation of Online Contract Monitoring System
- A Lightweight Implementation of Online Medical Refferal and Inventory System
- A Lightweight Implementation of Online Voting System
- A Lightweight Implementation of Online Funds Management System using PHP with Oracle
- A Lightweight Implementation of Online Training Feedback Information System
- A Lightweight Implementation of Online Complaint Monitoring and Redressal System
- A Lightweight Implementation of Online Lateral Recruitment Portal
- A Lightweight Implementation of Online HINDI Gyan Survey Portal
- A Lightweight Implementation of Online DAK Monitoring Portal
- A Lightweight Implementation of Online Budget Monitoring System
- A Lightweight Implementation of Online Debtor Management System
- A Lightweight Implementation of Online DATACARD Inventory Portal
- A Lightweight Implementation of Online Invoice-linked Debtor Management System
- A Lightweight Implementation of Online Bio-metric Attendance Regularization System
- A Lightweight Implementation of Online Document Management Portal
- A Lightweight Implementation of Online Site Quality Reporting System
- A Lightweight Implementation of Online Site MIR Portal
- A Lightweight Implementation of Online GST-Integrated Debtor Management System
- An Android-based Mobile App for GST-Integrated Debtor Management System Reports
- An ISMS-Compliant Change Request management Portal
- A SDLC-(Software Development Life Cycle)-based Application Development Portal
- An Online CAR Parking Slot Allotment Lottery System for BEHCOS Flat Owners
- A Lightweight Implementation of Asset Inventory & Gate Pass System
- A Lightweight Implementation of Debtor Position System with Android Interface
- A Lightweight Implementation of Dept Admin's Dashboard for monitoring Employees' Attendance/Leave/OD/Tour
- A Lightweight Implementation of Critical Material Monitoring System for SURATGARH site
- A Lightweight Implementation of File/Note Tracking System for Project Management Group
- A Lightweight Implementation of Critical Vendor Issues Monitoring System for SURATGARH site
- An Online BRC Membership Drive Portal
- A Lightweight Implementation of HR Complaint Monitoring System in VB.Net
- A Lightweight Notesheet Approval System
- A Lightweight Implementation of Site HR MIR Portal
- An Invoice Status Monitoring System Implementation
- A Lightweight Implementation of Billing Break Up (BBU) Monitoring System
- A Lightweight Implementation of Crossword Puzzle based Quiz Portal
- A Generic MCQ based Online Quiz Portal
- An Online SPARE Portal in Weblogic
